OBJECTIVE

Computer Engineering graduate with hands-on experience in C++, Java, React.js, Spring Boot, MySQL, and full-stack web development. Seeking an entry-level software engineering role where I can apply my technical skills, contribute to innovative software solutions, and continuously learn and grow in a collaborative and challenging environment.

SKILLS

Technical Skills:

- C++, Java, JavaScript
- React.js, HTML5, CSS3
- Spring Boot
- SQL, MongoDB
- Git / GitHub, RESTful APIs
- Cloud Computing (AWS fundamentals)

EDUCATION

SKN Sinhgad Institute of Technology and Science — **2022 – 2026**
Bachelor of Engineering in Computer Engineering *(CGPA: 7.75)* — Pune, India

Shri Mhalsakant Junior College — **2020 – 2021**
Higher Secondary Education *(Percentage: 83.33%)* — Pune, India

Saraswati Madhyamik Vidyalaya — **2018 – 2019**
Secondary Education *(Percentage: 85.20%)* — Pune, India

PROJECTS

Reviewline – AI Code Review SaaS — React.js, Spring Boot, MySQL, Claude API, Stripe
GitHub: Backend — Frontend

- Developed a full-stack AI code review platform with JWT authentication, Google OAuth2 login, and email verification, where users submit code and receive bug, security, and style findings anchored to exact lines.
- Built RESTful APIs using Spring Boot and MySQL to integrate the Claude API, with structured JSON prompting, defensive response parsing, automatic language detection, and per-user review history.
- Integrated Stripe subscription billing (test mode) with webhook-driven plan updates, a customer portal, and server-enforced monthly usage limits; deployed on Vercel, Render (Docker), and Aiven MySQL.

PulseTrade – Real-Time Crypto Tracker — Spring Boot, Kafka, Redis, MySQL, React.js
GitHub: github.com/suraj02452/pulsetrade

- Developed a real-time crypto price tracker streaming live Binance prices for 15 coins through Kafka and WebSockets (STOMP), with watchlists, portfolio P&L tracking, and price alerts.
- Designed an event-driven Spring Boot backend secured with JWT, using Redis sorted sets for fast alert matching and an atomic database update so alerts fire exactly once.
- Built a responsive React.js + TypeScript interface with live price charts and dark/light themes; added integration tests with Testcontainers and CI using GitHub Actions.

HACKATHONS & ACHIEVEMENTS

HackerRank Orchestrate 24-Hour Hackathon – Rank 600/2,000+
AI-Powered Message Notification Router — Python, Claude Code — View Certificate

- Developed a multimodal notification-routing system classifying messages as Notify, Digest, or Mute using contextual and historical user data.
- Processed text, image, and voice-note inputs to generate personalized notification decisions.
- Used Claude Code for AI-assisted development and iterative problem solving during the 24-hour hackathon.

CERTIFICATIONS

- **AWS Certified Cloud Practitioner** - Amazon Web Services (2026)
